AI'S IMPACT ON LOVE, BREAKUPS AND DIVORCE – A PHILOSOPHICAL OBSERVATION

Dr. Mrinal Kanti Sarkar

Abstract

Artificial intelligence (AI) is now influencing almost every aspect of our lives, including our romantic relationships. While traditional methods of dating and marriage persist, AI introduces new possibilities for finding love and navigating breakups. AI assists in matching people through dating apps, provides personalized relationship advice, and offers support resources for managing breakups. Though it cannot change our emotions, AI-driven tools make these deeply human experiences more manageable and tailored to individual needs. By enhancing how we connect and communicate, AI is reshaping modern romance, offering innovative ways to foster and maintain relationships. These advancements demonstrate how AI can support and enhance our emotional lives, making romance more accessible and adaptable to contemporary demands.
